- Data Cloud**
- Discussion**

“Resources for COVID-19” at Harvard Dataverse

Procedure of Data Crawling

Obtain HTTP interface of Gaode POI data, and determine the type and location of POI

Extract the rectangle of administrative divisions and retrieve the number of pois

Rectangle segmentation beyond data limit based on quarter method

Extract POI data for each rectangle

Data processing

Q: When retrieving a POI of a certain category, if the number of POIs of this category exceeds 890, the excess part will be lost and cannot be obtained

Data Processing

Data Depository: dataverse.harvard.edu

Open source research data repository software

Researchers

Enjoy full control over your data. Receive *web visibility*, *academic credit*, and *increased citation counts*. A personal dataverse is easy to set up, allows you to display your data on your personal website, can be branded uniquely as your research program, makes your data more discoverable to the research community, and satisfies data management plans. [Want to set up your personal dataverse?](#)

Journals

Seamlessly manage the submission, review, and publication of data associated with published articles. Establish an *unbreakable link* between *articles in your journal* and *associated data*. Participate in the open data movement by using Dataverse as part of your journal data policy or list of repository recommendations. [Want to find out more about journal dataverses?](#)

Institutions

Establish a research data management solution for your community. Federate with a growing list of Dataverse repositories worldwide for increased discoverability of your community's data. Participate in the drive to set norms for sharing, preserving, citing, exploring, and analyzing research data. [Want to install a Dataverse repository?](#)

Developers

Participate in a vibrant and growing community that is helping to drive the norms for sharing, preserving, citing, exploring, and analyzing research data. Contribute code extensions, documentation, testing, and/or standards. *Integrate research analysis, visualization and exploration tools*, or other research and data archival systems with Dataverse. [Want to contribute?](#)

The screenshot shows a web browser window with the URL `dataverse.harvard.edu/dataverse/2019ncov`. The page title is "Resources for COVID-19 (China Data Lab)". The navigation bar includes "Add Data", "Search", "About", "User Guide", "Support", "Sign Up", and "Log In". Below the title, there are four category buttons: "Data", "Development Code", "News Report", and "Research Papers". A search bar contains the text "Search this dataverse..." and a "Find" button. The search results section shows "1 to 6 of 6 Results" and lists the following items:

- Dataverses (6)**
- Datasets (0)**
- Files (0)**
- Dataverse Category**
 - Research Group (6)
- Publication Year**
 - 2020 (6)

The search results list the following items:

- Data (China Data Lab)** 2020-2-11
- Research Papers (China Data Lab)** 2020-2-11
- Workflows (China Data Lab)** 2020-2-11
- Web Sites (China Data Lab)** 2020-2-11
- News Report (China Data Lab)** 2020-2-11

A "Feedback" button is visible at the bottom right of the results list.
